

Lab Two

This lab will require you to create the HTML structure of the wireframe that has been provided. Please follow the instructions below:

1. Create an HTML document and name it index.html
2. Add the core HTML elements and make sure to include all the required metadata
3. Using semantic elements, create the HTML structure for the wireframe that is provided
4. If working in pairs:
 - a. Add an HTML comment containing both names
 - b. All members must contribute to solving the lab
5. Submit your lab folder and files to your GitHub repository and Lamp Stack if available
